EDUCATION

K.J. Somaiya College of Engineering, Mumbai
B.Tech in Computer Engineering — CGPA: 7.9/10

Expected Graduation: Aug 2028

EXPERIENCE

Co-Head of Technology — Prudencia MUN, Mumbai

Mar 2026 – Jul 2026

- Led technical operations for a 1,000+ delegate Model UN conference, managing a team responsible for infrastructure, AV, and live technical support.
- Built and maintained the conference website and delegate dashboard.
- Provided real-time AV and live technical support throughout the event.

Deputy Head of Technology — Prudencia MUN, Mumbai

Jul 2025 – Feb 2026

- Supported technical planning and execution ahead of taking over as Co-Head of Technology.

PROJECTS

Guardrail — SAST Vulnerability Scanning Dashboard

Jul 2026 – Aug 2026

- Built a full-stack MERN dashboard (React, Node.js, Express, MongoDB) that integrates Semgrep to run static application security testing (SAST) scans against GitHub repositories.
- Validated the scanning pipeline in an initial test run across 4 repositories, returning correct vulnerability findings in each.
- Designed the repository-ingestion and results pipeline to support ongoing scans beyond the initial validation set.

NSMS — Network Security Monitoring System

Jul 2026

- Built a Python log analysis pipeline that parses authentication logs and enriches source IPs via the AbuseIPDB API to flag malicious activity.
- Processed a simulated dataset of 2,200 log entries across 12 IPs (RFC 5737 test ranges), flagging 81 failed login attempts and 11 cases of a successful login following a brute-force pattern.

SKILLS

- Security: OWASP Top 10, vulnerability scanning, threat intelligence enrichment, security event monitoring, log analysis, OSINT, Wi-Fi security, DoS/DDoS attacks
- Networking & Systems: TCP/IP, DNS, routing fundamentals, Linux administration
- Security Tools: Wireshark (protocol & TLS handshake analysis), Nmap (host/service discovery, aggressive scans), Burp Suite (web app proxy & scanning), OpenVAS/Greenbone (vulnerability scanning)
- Languages & Stack: Python, Bash, JavaScript, React.js, Node.js, Express.js, MongoDB
- Active Learning: TryHackMe — Pre Security & Cyber Security 101 paths
